

Extreme events: Past and future changes in the attributes of extreme rainfall and the dynamics of their driving processes.

KSA/1960

Dr Christopher Lennard, Ms Lisa Coop, Mr Rory Grandin, Mr Dave Morison
Climate Systems Analysis Group
University of Cape Town
South Africa

Notes for the reviewers

1. The report is not yet complete, sections in red are being worked on at the moment

2. All the files referred to below are in

<http://www.csag.uct.ac.za/~lennard/WRC/>

2. There is one section with images that are rather large therefore I have produced 2 versions of the draft. The first version includes the images and is 11Meg big so I will not email it. This version can be downloaded from by cutting and pasting the following URL into your browser:

<http://www.csag.uct.ac.za/~lennard/WRC/DraftFinalReport020312.NoPics.pdf>

3. The images for the smaller document can be found in the file :

RegionalPics95th.pdf
