NOTES:

- Capacity of the major dams of the Western Cape Water Supply System is 99.6% and that of the minor dams 0.4% of the combined capacity of the major and minor dams. Kindly note that all the Major Dams show gross capacity.
- All figures are for 13 May for each year except for those in the second column, which gives the figures for the previous week of this year.
- The last 10% of a dam's water is difficult to use, the useable water in the dam is approximately 10% less than the dam level.
