AVERAGE TOTAL
DAILY WATER USE
(MLD)*

874

AVERAGE WATER USE
PER PERSON (l/d)**

149

* The total daily water usage is the total water provided by the City of Cape Town and includes water provided to Stellenbosch and Drakenstein Municipalities

** The average per person water use is the average for the City of Cape Town only and is estimated as Total Water Use / Population. Summer demands are expected to be higher than the yearly average due to the increased use of water for outdoor irrigation. Average water use per person over the last 12 months was approximately 160 l/d

Water Resource Status

WATER RESOURCE STATUS	MEANING OF CURRENT STATUS
Early Drought Caution	'Continued water wise use encouraged due to lower than anticipated dams level, cautioning possible start of a drought cycle' The main dams supplying the City are approximately 20% lower than last year - as shown on Page 3. While there is no immediate reason for concern, this updated drought risk status is part of the City's proactive approach to monitoring for and managing future droughts. This status and the corresponding actions are discussed in the Water Outlook 2023. The Water Resource Status will be updated again in May 2026.

This table shows CCT drinking water quality compliance according to the South African National Standard 241:2015. Compliance, measured against all prescribed chemical and microbiological components, consistently exceeds the very high CCT target of 99%. (Overall compliance percentages of continuous sampling and analysis are released on a monthly basis.
